WINEMAKING

VINEYARD

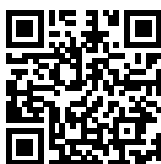

The 2025 growing season began with a wet, cool May, but was ultimately defined by a hot, dry summer (rainfall from mid-June to mid-August was less than 50% of normal) with low disease pressure and high sugar accumulation.

HARVEST

Harvest began early, yielding unusual red grape ripeness and high-quality white wines, making it a promising vintage overall.

WINEMAKING

The juice was then fermented dry in stainless steel tanks.
