WINEMAKING

VINEYARD

Our Nimbus estate is a vineyard located at the west end of the Casablanca valley –one of Chile's most celebrated cool-climate wine region–, located 80 km from Santiago and 20 km east of the Pacific Ocean. The soil is granite of variable depth over fractured bedrock, which allows roots to grow deep. The valley offers cool temperatures during the growing season and ever-present morning fogs that allow grapes to ripen slowly, which adds complexity and concentration to the resulting wines.
